<http://www.youtubehelpcenter.com> Linked videos are downloadable video clips from YouTube , similar to flash video players like Flash Lite . When you link a YouTube video , this is known as embedding the video . The embedded link will have the same look and feel of the original YouTube page, but behind the scenes, all of the downloading takes place within this downloader . You can then play the linked resource locally , on your computer, on your device , or by streaming it to your TV .

Due to its open source nature, this software is usually available at no cost. Though some may charge for support and consulting services.
